Synthese

DEEP DIVE: H2 GLOBAL

Rodrigo Pinto Scholtbach| EZK

Bridging

Create business cases and investment security:

Shifting the timing of a market creation by promoting the market ramp-up until a viable green market has developed

Contracts for Difference

Financial compensation in analogy to CfD mechanism:

Set up of an PtX intermediary - the Hydrogen Intermediary Company

Defined system

Long-term purchase agreements over 10 years

Clear definition of max. funding volume, products, geography and (sustainability) criteria

Twin-auction-based

Competitive bidding procedures on the supply and demand side

Minimization of the price difference to be compensated by contributions

THE INTERMEDIARY: HINT.CO

Auctions for the purchase and resale of PtX products take place in German

Gasunie: a connecting factor in the energy value chain

Providing open access and non-discriminatory infrastructure in The Netherlands and the Northern part of Germany

H2Global | current view

What

Funding import of three carriers
Ammonia | Methanol | SAF

Aim

De-risk H2 investment
decisions import value chain

How

Step 1 – 10Y supply HPA (Dec.'22)
Step 2 – 1Y offtake HSA (timing?)

Budget

2022 Window €0.9 bln. (GER)

Note: equal per carrier

2023 Window €3.5* bln. (GER)

2023 add fund NL €0.3 bln.**

* criteria not defined yet ** to be approved in spring

H2Global

Observations of H2Global

Destination clause = EU
(not country specific)

One funding country
(GER)

CfD based on product
price (not H2 price)

Equal funding per carrier

Export countries global but
excluding supply from
South Europe

Carriers

- only 3 H2 derivatives
- no pure H2, LH2, CH2 or LOHC

CfD scope excl conversion of derivatives

Two key questions:

Aim: to further improve the instrument to the built-up of the hydrogen value chain

Question 1

CARRIERS

Ammonia | Methanol | SAF

How to improve the instrument?

- Carrier preferences?
- Funding weight?

Two key questions:

Aim: to further improve the instrument to the built-up of the hydrogen value chain

Question 2

EXPORT REGION

Outside EU and EFTA States

Where is added value to improve?

- Target on specific countries/regions?

NAAR EEN EU CONTRACT FOR DIFFERENCE SYSTEEM

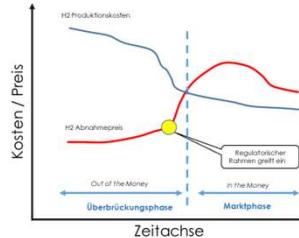

Cornerstones and core elements

Bridging

Immediate creation of instruments for market ramp-up until regulatory framework takes effect

Defined system

- Creation of a system limited to at least 1 GW
- Clear time limit of 10 years

Contracts for Difference

- Compensation payments in the form of CfDs
- Setting up an H2 intermediary: the HYDROGEN INTERMEDIARY NETWORK COMPANY, HINT.CO

Competition

- Auctions (or comparable mechanism) on H2 buy and sell side
- Setting competition-based prices on both sides

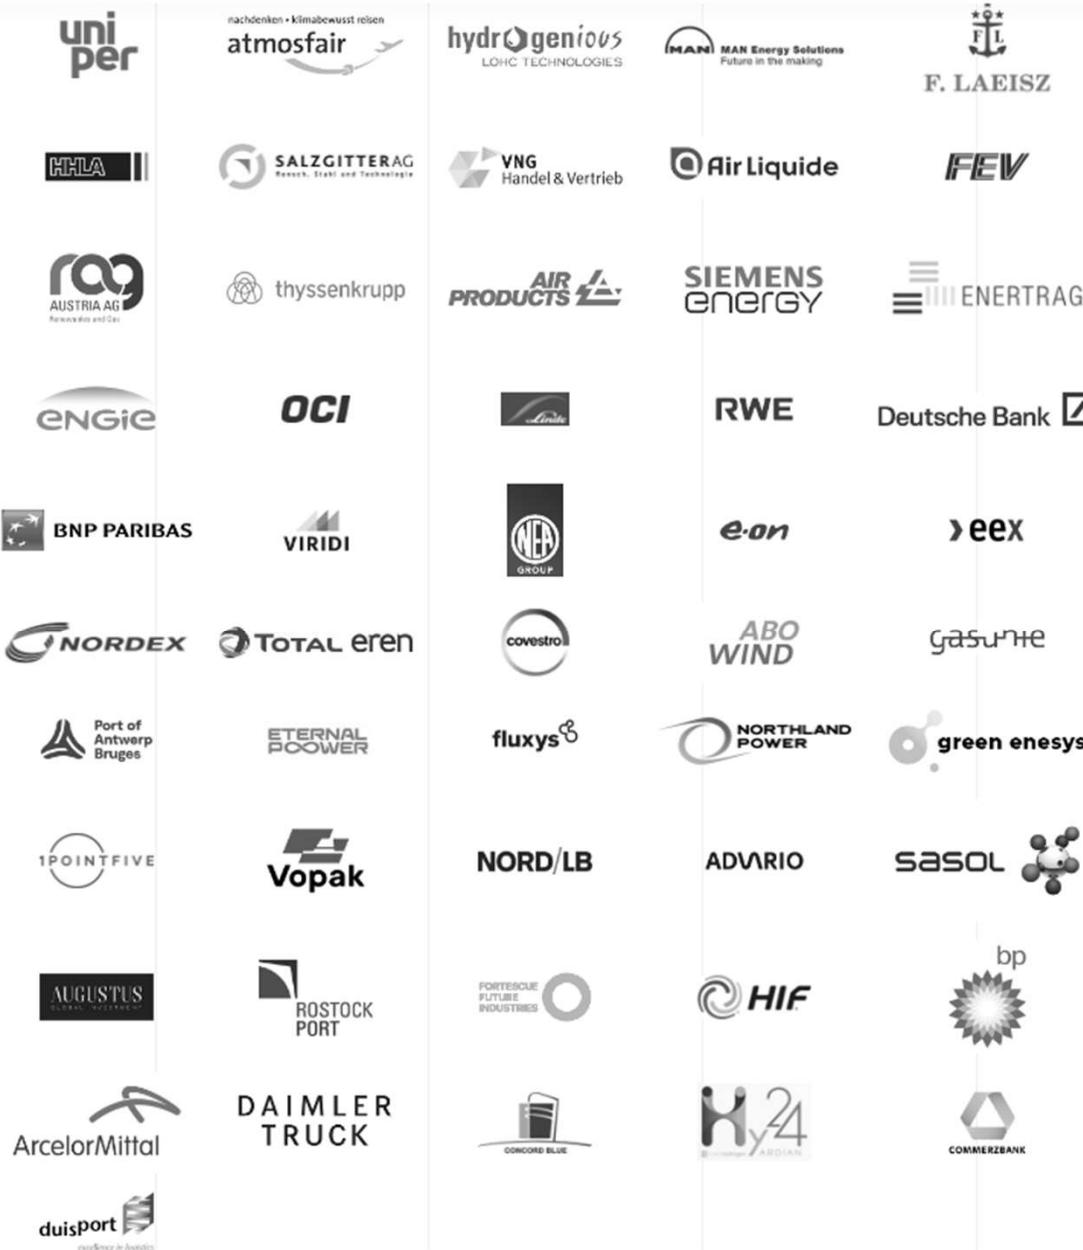

ENKELE KENMERKEN

De eerste veiling(en) is/worden uitgezet. Enkele kenmerken:

- Fonds van 900 M€ ingebracht door BMWK (Duitse EZK)
- Inkoop buiten EU en EFTA
- Aanlevering via een daartoe geschikte haven in België, Nederland of Duitsland,
- Verkoop aan Duitse en EU companies aan de hoogste bieder.
- Producten gebaseerd op groene H₂: ammonia (lopend) en later methanol, jet-fuel
- Tender voor ammoniak 360 M€ over looptijd van 10 jaar
- Elektriciteit uit additionele hernieuwbare bronnen. CO₂ Emissie reductie over de keten well-to-wheel 70%
- Eerste levering eind 2024 begin 2025 verwacht

H2 GLOBAL STIFTUNG

- Purpose of non-profit H2Global Stiftung: promote environmental and climate protection.
- Open to all interested companies and institutions that want to shape the transformation towards climate-neutral energy sources
- The H2-Global Stiftung is owner of the auction model. Objectives:
 - Development of H2Global and the implementation and operation of Hintco GmbH
 - Further development of the double auction mechanism and of additional funding windows [e.g. EU (internal market & import into the economic area);
 - Focus on accompanying application-oriented research
 - Network for players in international H2 and derivatives trade

NEXT STEPS

- Eerst veilig voor NH3 loopt, volgend voor methanol en e-SAF aangekondigd
- Lessons learned uit 1^e veilingen
- Evolutie van het instrument (budget, schaal, parameters als looptijd, stoffen, landen)

- Indien de H2Global Contract for Difference (CfD) systematiek zich richt op het verschil tussen vraag en aanbod van groene waterstof gemaakt uit geïmporteerde waterstofdragers, moeten de conversiekosten ook door het CfD mechanisme afgedekt worden gedurende de gehele looptijd van het lange termijn leveringscontract.
- De afname contracten moeten langer zijn dan 1 jaar.
- De intermediair is verantwoordelijk voor de opslag van groene waterstof/waterstofdragers.
